To our valued customers,

As most of you know both our septic truck tanks collapsed earlier this year which unfortunately put us out of hauling septic. We want to apologize for the untimely chaos the past few months. First time business owners and our mismanagement had us unprepared for the catastrophic breakdowns. Learning the hard way is rough.

We are happy to announce that we are back on the road ready to service your septic needs. Thank you for your patience with us as we worked through getting back up and running.

We are booking for up coming fall pump outs. If you would like to be added to the fall list please email or txt indicating your name, location, and phone number and we will contact you when we are in your area.

Kind regards,

GCM Septic and Water

Todd Briens
